ideas for great
wall systems

This combination sitting room, media space, and display gallery is all tied together with wall systems. The open knee-wall shelf curves to follow the window bay, leading the eye toward the fireplace-flanking open shelves and closed, Euro-style cabinets.

Handsome, vertical veneers wrap around seamless home office built-ins, integrating bookshelves, display spaces, and an extra-tall soffit area above window level. Note the floating kickspace below the units, which are anchored to the wall, not the floor.

Part room, part wall system, this walk-in window seat alcove has built-ins throughout. Shelves flank the doorway and ring the window, and drawers pull out below the cushion. Black backs on shelf bays add depth and contrast to display items.
